

SPONSORSHIP OPPORTUNITY

Bengawan UV (Unmanned Vehicle) Naval Team

Bengawan UV Roboboat team is a Sub-team of Bengawan UV Sebelas Maret University which has been established since December 2016. Bengawan UV Roboboat Team focuses on research and development of unmanned surface vehicle in Indonesia. This team also aims to advance research especially in science and technology at our campus, Sebelas Maret University. This year, Bengawan UV Team to join Roboboat competition which focuses on Research, Development, and Building Autonomus Vehicle.

About Bengawan UV Naval Team.

Bengawan UV is a team that conducts research in the field of the Surface Unmanned Vehicle (unmanned vehicle), namely the Bengawan UV Team. The team that carries 'Aksatriya Nalendra Madyantara' which in ancient Javanese means 'knight of the Ruler of the World', began to establish its milestone in December 2016, currently consists of 3 divisions namely Electric Boat, Autonomous Boat and Gasoline Boat. We are the only student organization at Sebelas Maret University that utilizes cutting-edge technologies such as photovoltaics and composite materials. The students in our machine shop design and manufacture motor controllers, transmission systems, composite molds, solar panels, hydrofoils, control systems, steering systems, and various other mechanical/electrical equipment. Our organization is modeled after engineering companies, where each member plays multiple roles in the success of the team. Team members have many opportunities to use their technical knowledge, develop creativity and improve project management skills.

Our Request

Bengawan UV team invites you to be a part of our team and support us to our journey in 2022 competition. Our goals is became winners in every competition and developed research on UAV and USV in Indonesia.
