

SPONSORSHIP OPPORTUNITY

Bengawan Unmanned Vehicle (UV) Naval Team

Bengawan UV RoboBoat Team is a sub-team of Bengawan UV Sebelas Maret University, which was established in December 2016. Bengawan UV RoboBoat Team focuses on the research and development of unmanned surface vehicles in Indonesia. This team also aims to escalate research, especially in science and technology at our campus, Sebelas Maret University. This year, the Bengawan UV Team joined the RoboBoat competition which focuses on Research, Development, and Building Autonomous Vehicles.

About Bengawan Unmanned Vehicle (UV) Naval Team

Bengawan UV is a team that conducts research in the field of Surface Unmanned Vehicles, namely the Bengawan UV Team. The team that carries 'Aksatriya Nalendra Madyantara' which in ancient Javanese means 'Knight of the Ruler of the World', began to establish its milestone in December 2016, and currently consists of three divisions namely Electric Boat, Autonomous Boat, and Gasoline Boat. We are the only student organization at Sebelas Maret University that utilizes cutting-edge technologies such as photovoltaics and composite materials. The students in our machine shop design and manufacture motor controllers, transmission systems, composite molds, solar panels, hydrofoils, control systems, steering systems, and various other mechanical/electrical equipment. Our organization is modeled after engineering companies, where each member plays multiple roles in the success of the team. Team members have many opportunities to use their technical knowledge, develop creativity and improve project management skills.

Our Request

Bengawan UV Team honorably invites you to be a part of our team by supporting us in our journey through the 2023 competition. Our goals are to become winners in every competition and develop research on UAV and ASV in Indonesia.
